

# Building a Robust Data Acquisition System

---

Ulises Vich

System Architecture Manager

# Industry trends and drivers affecting manufacturing and automation

Local production for local consumption

Consistent worldwide quality assurance

“Ultra” high precision assembly

Growing shortage of skilled workers

Rapid launching of equipment startup

Consumer demands driving need for flexible manufacturing

Surging labor costs in emerging countries

# Does anyone have one of these devices?

1990's

2000's

2010's

Future?

# What is the Difference Now ???

# IIoT Terminology

## Industry 4.0 (I4.0)

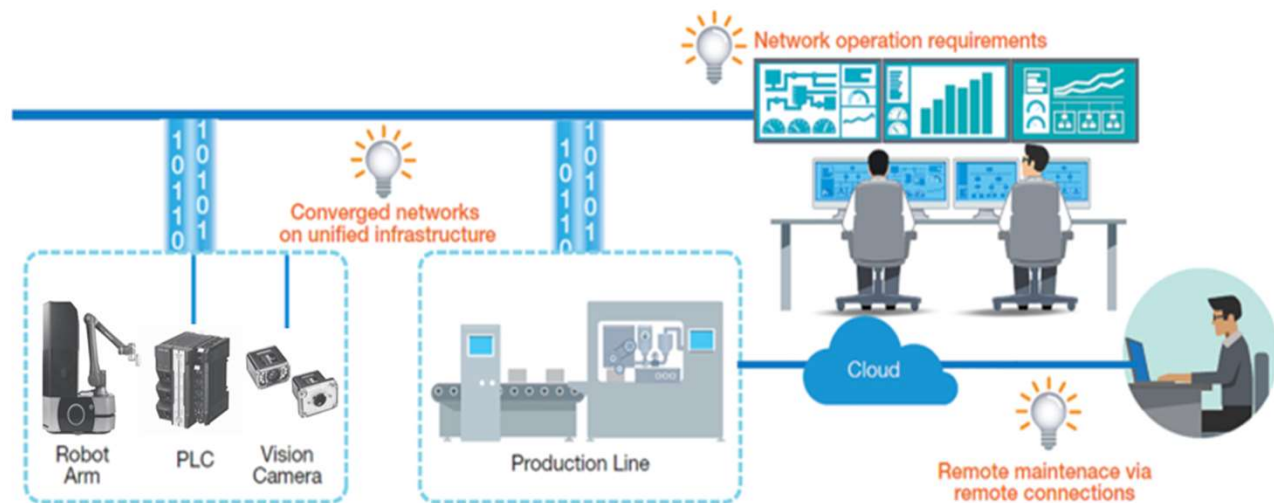

The movement of businesses into data driven decisions.

## Digital Transformation

The digitization of the business. Unified and Real-time.

## Industrial Internet Of Things (IIoT)

The result, the information people need, where when and how they need it. Perfect analogy is the iPhone for industry.

[Three tips on getting industrial IoT networks ready for the future \(designworldonline.com\)](https://www.designworldonline.com)

# The value chain of information

GATHER DATA

UNDERSTAND DATA

COMMUNICATE THE DATA

TAKE ACTION

# Smart Manufacturing and Information

ISA International Society of Automation

ISA 95

Smart Factory

- Report
- Find Patterns
- Predict Outcomes
- Solve Problems

## Reporting and Response

Data is Transformed into valuable business information.

- Analyze
- Visualize

## Delivery and Presentation

Data needs to go to the right people, at the right time, in the right format.

- Connect
- Collect
- Store

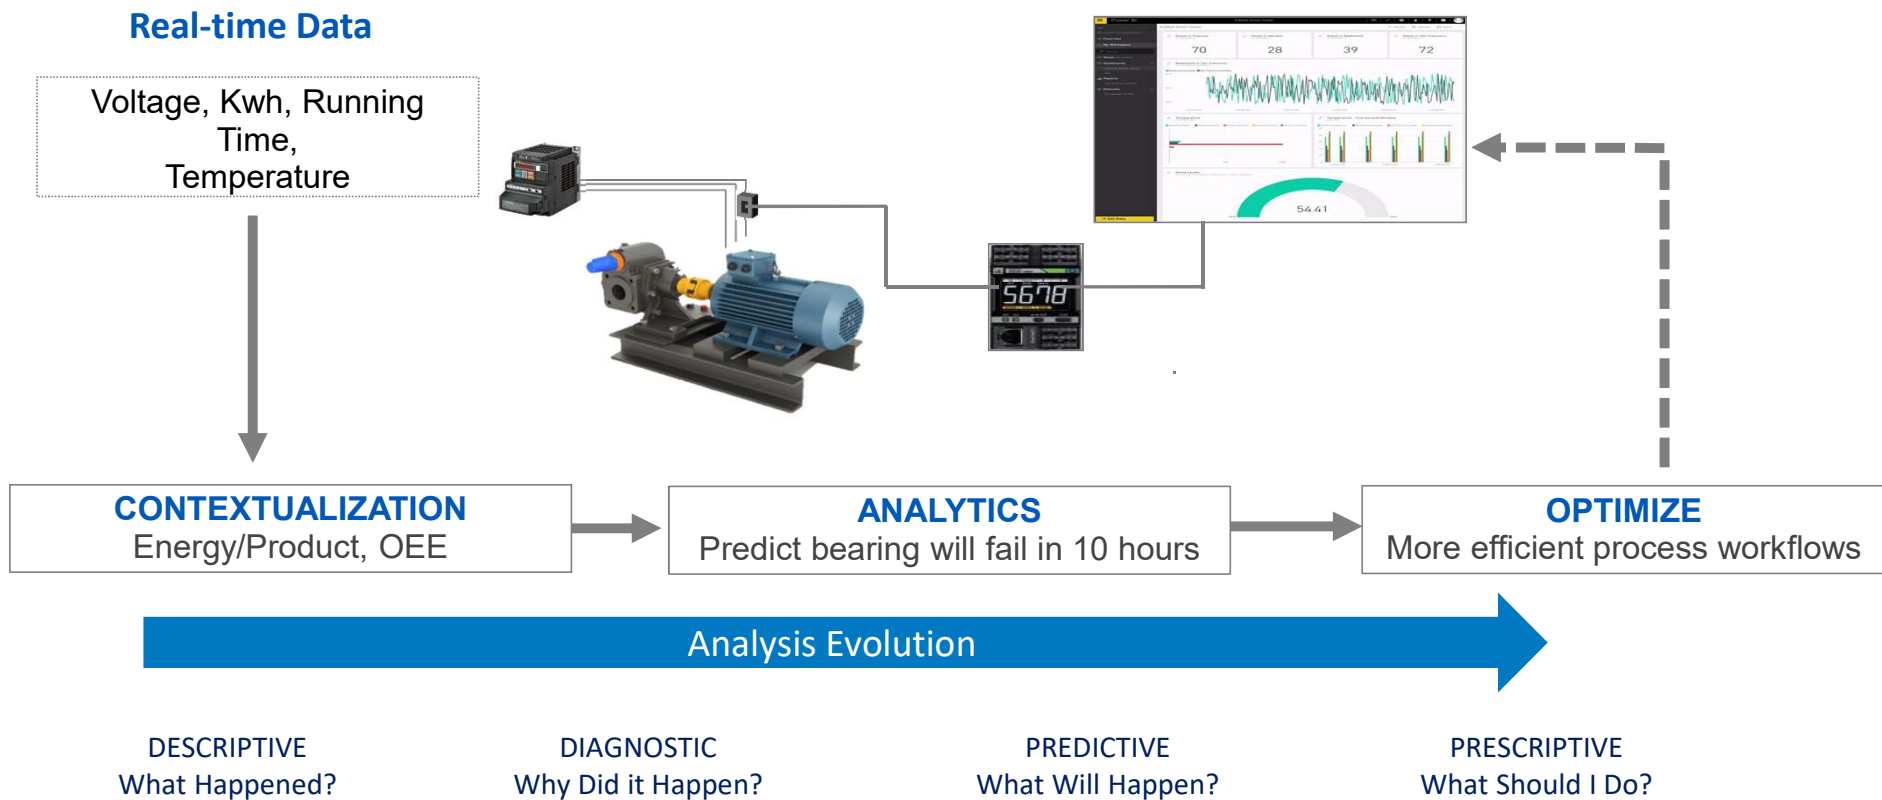

## Source

Intelligent assets in operations hold hidden data needed to make critical business decisions...

(management)  
sequor  
INDUSTRIAL SOFTWARE  
Monitoring

SCADA-HMI-MI LINK-I  
Energy consumption

# Smart Manufacturing and Information

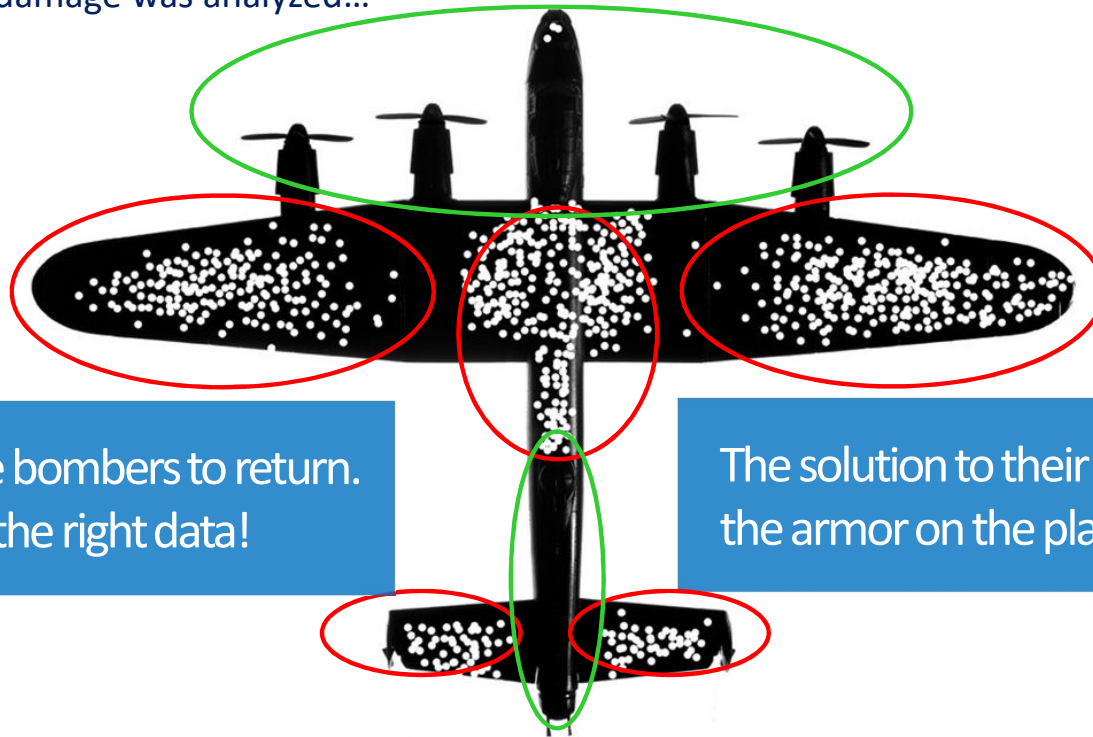

# Contextualization

Pay attention to the right information

# Analytics

- Researchers at the Center for Naval Analysis faced a critical problem.
- Many bombers were getting shot down on runs over Germany.
- The **returning** bombers damage was analyzed...

These areas allowed the bombers to return.  
Focus your analytics on the right data!

The solution to their problem was clear. Increase  
the armor on the plane's wings and body.

# Optimize

WHICH OF THE TWO MAKES MORE SENSE TO YOU?

Utilize statistical information to improve processes and production.

# Two key pillars of digital transformation

## Return of Investment

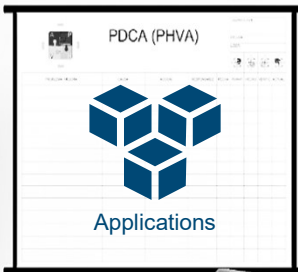

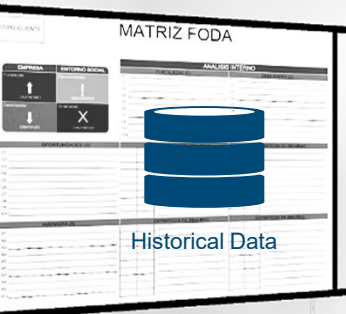

Analytics

Asset Utilization

Safety & Security

Asset Monitoring

Off the shell Solution

Identify Barriers

Apply New Tactics

Better Collaboration

Gain Insights

Minimize pain points and bring about innovative changes

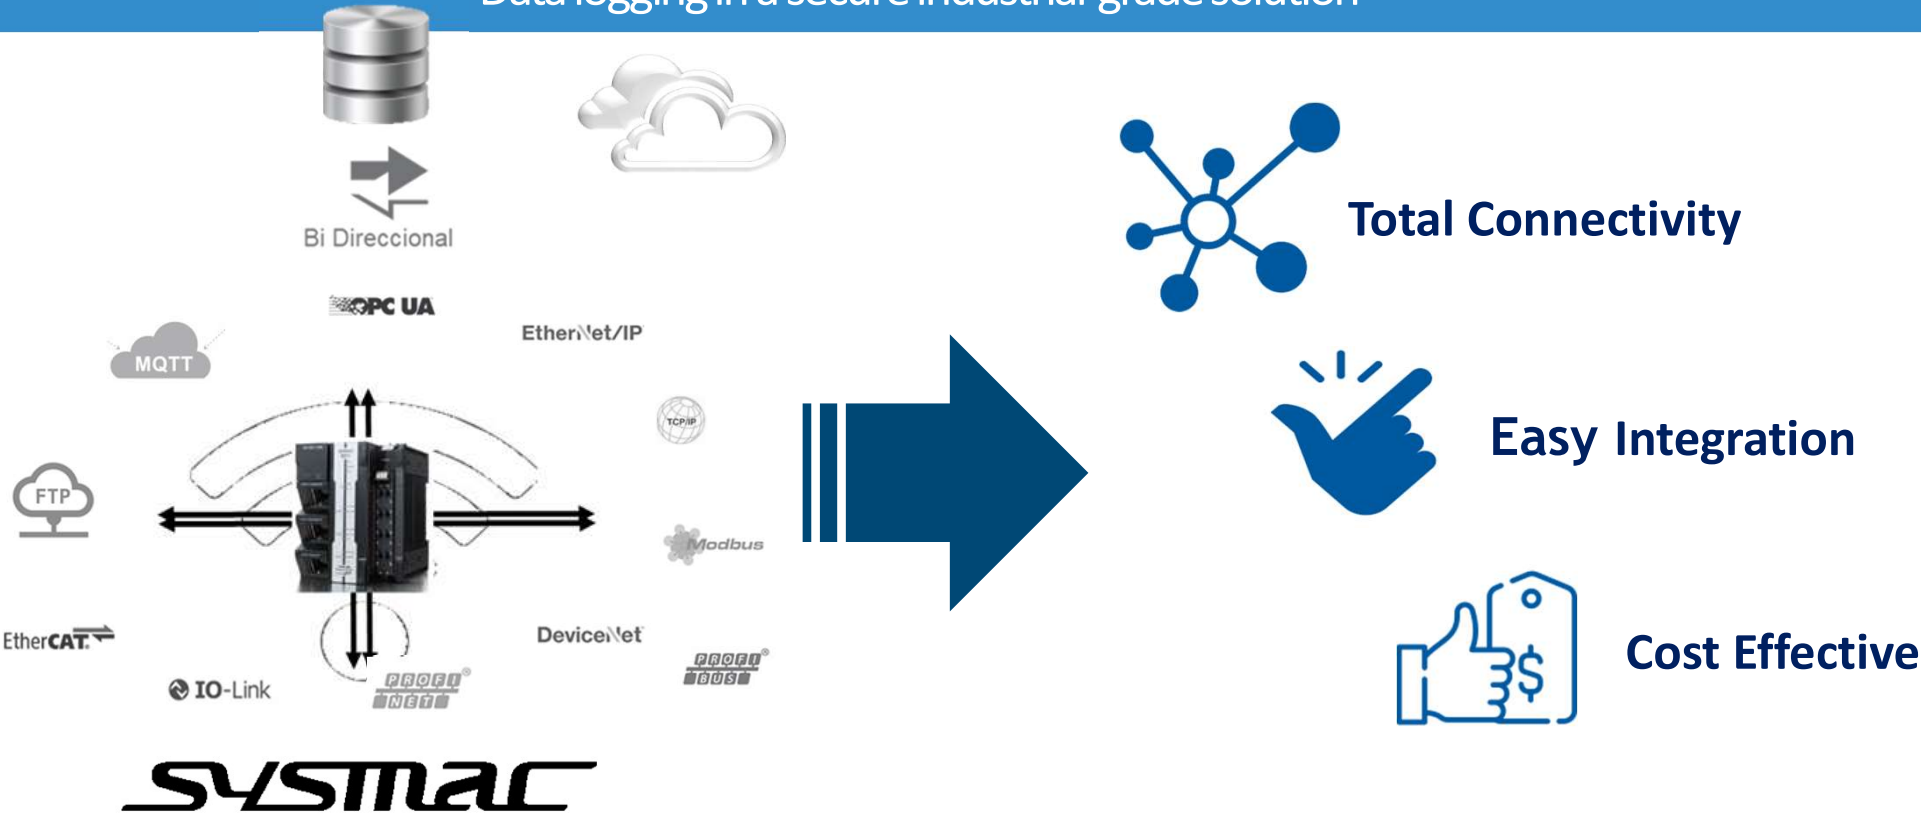

Understanding of real time data

Utilize Relational Data

# Universal IIOT GATEWAY

Data logging in a secure industrial-grade solution

# Simple and secure connection

# Building your own report structure

Sysmac OMRON

DB SQL

The image shows a composite screenshot of Sysmac Studio and Microsoft SQL Server Enterprise Manager. In Sysmac Studio, the 'DB Connection Service Support Tool' is open, showing the 'Target Controller' dialog with IP address 192.168.250.2. Below it, the 'DB Table' tab shows the structure of the 'BimboDatos' table. In SQL Server Enterprise Manager, the 'Structure (Data type)' tab shows the table structure for 'dbo.BimboDatos'.

*Building a robust data acquisition system. Imperative for industries looking to increase productivity and achieve operational resilience*

Column Name	Data Type	Allow Nulls
HrsTrabajadas	decimal(18, 0)	<input checked="" type="checkbox"/>
Z1SP	real	<input checked="" type="checkbox"/>
Z1PV	real	<input checked="" type="checkbox"/>
Z1CV	real	<input checked="" type="checkbox"/>
Z2SP	real	<input checked="" type="checkbox"/>
Z2PV	real	<input checked="" type="checkbox"/>
Z2CV	real	<input checked="" type="checkbox"/>
Z3SP	real	<input checked="" type="checkbox"/>
Z3PV	real	<input checked="" type="checkbox"/>
Z3CV	real	<input checked="" type="checkbox"/>
FechaReg	datetime	<input checked="" type="checkbox"/>
		<input type="checkbox"/>

```
CREATE TABLE 'BimboDatos' (
  'HrsTrabajadas' SMALLINT,
  'Z1SP' FLOAT,
  'Z1PV' FLOAT,
  'Z1CV' FLOAT,
  'Z2SP' FLOAT,
  'Z2PV' FLOAT,
  'Z2CV' FLOAT,
  'Z3SP' FLOAT,
  'Z3PV' FLOAT,
  'Z3CV' FLOAT
```

# Success Story 1 - Tier 1 Global Supplier

# Pain Points

## Corporate

- Organizational alignments.
- Technology Adoption.
- Locked into one vendor.

## IT

- No communication with OT or Manufacturing.
- Communication Restrictions.

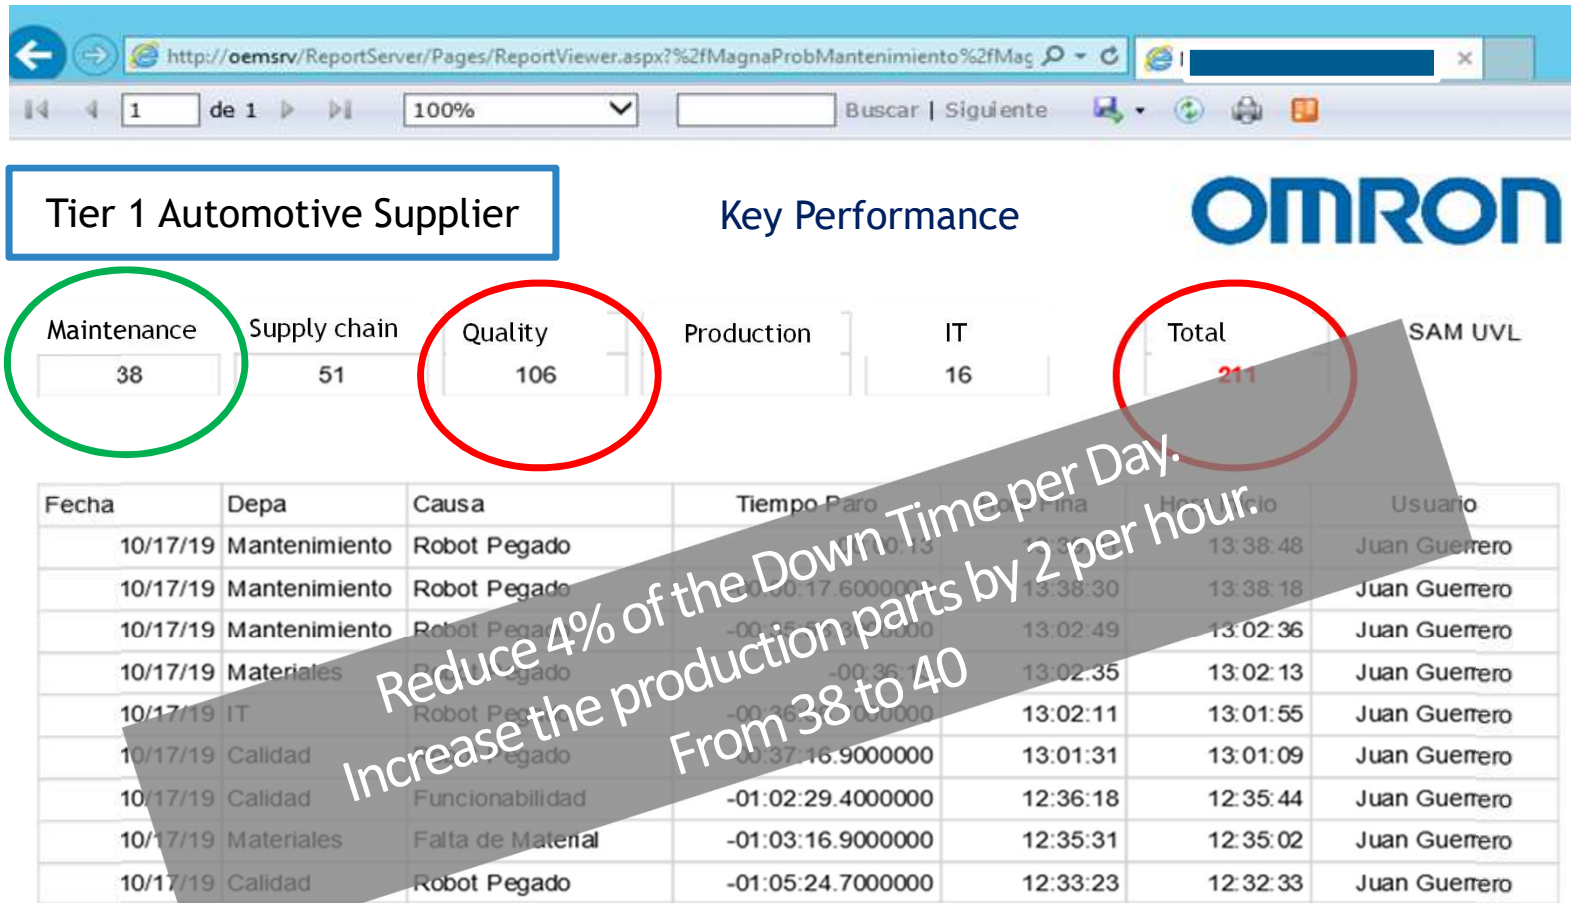

## Production

- Low adoption of information technology from the floor shop to the control center.
- Poor communication between areas.

# Shop Floor Process

# Maintenance Dashboard

Reduce 4% of the Down Time per Day.  
 Increase the production parts by 2 per hour.  
 From 38 to 40

## Success Story 2 - Tier 1 Global Supplier

# Pain Points

## Corporate

- Locked into one vendor.

## IT

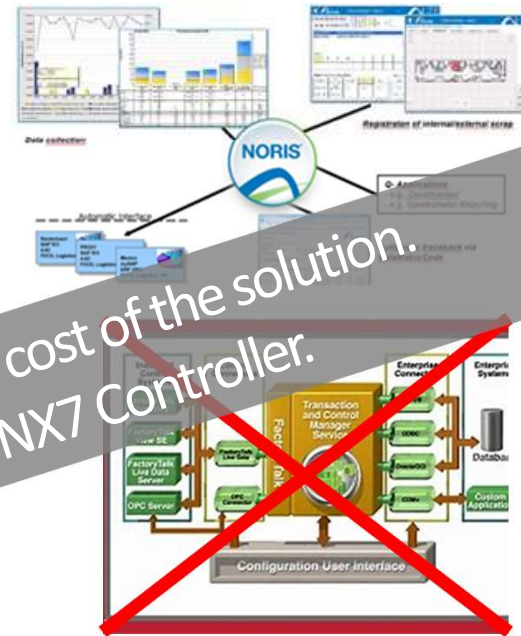

- Customer Developed their own Real-time Information System
- Poor communication with Manufacturing.
- Communication Restrictions and not flexible in the network infrastructure.

## Production

- The system was already running a Solution (2 years already).
- Poor communication between areas.
- no controls programming standards

# Tier 1 Global Supplier

# Noris: N. Operation Real-time Information System

Reduce more than 60% the cost of the solution.  
The main interface is NX7 Controller.

Software Database Connectivity

Plants Amplification: Plant 3&4, CDT, 5&6, 12  
Phase 2: Plant 1&2 and Machined

# Visualization is the KEY!!!
