

The OMRON logo is displayed in a bold, blue, sans-serif font. The background of the slide is a dark purple gradient with abstract, glowing white and purple lines that resemble a network or data flow.

SEPTEMBER 2022

Investing in Manufacturing Performance & Operational Resilience

Fabio Terezinho – AVEVA VP Global OEM Sales

The AVEVA logo is shown in a white, bold, sans-serif font. The letters 'A', 'V', and 'E' are connected, and the 'V' has a unique shape with a horizontal bar.

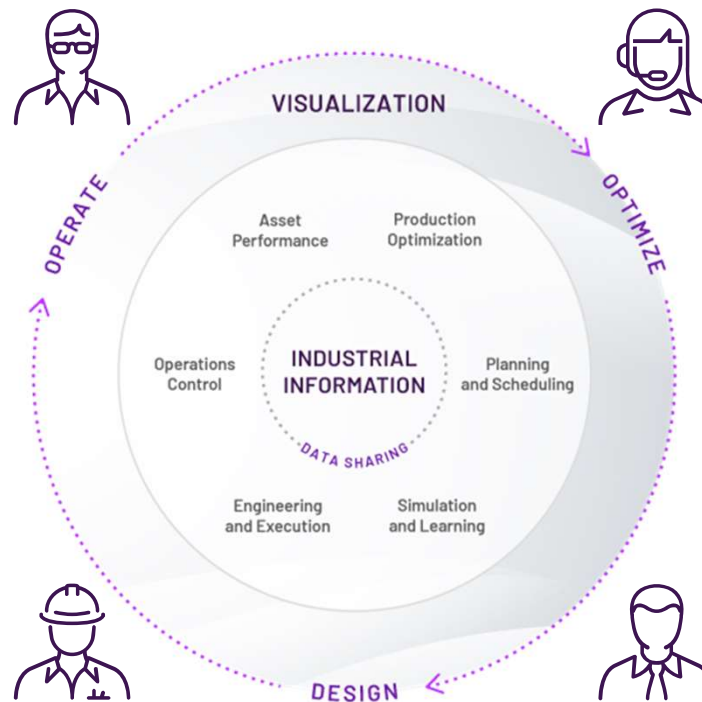

Introduction

AVEVA

AVEVA is a leader in sustainable industrial platforms and software

AVEVA is uniquely positioned to deliver a **complete digital thread purpose build for industry**

- **FTSE 100** listed on the London Stock Exchange
- **Market leading positions** in operations information
- **Global partner ecosystem** of over **5,000** partners
- **Open and agnostic** solutions

Ecosystem

20,000+
customers

8+
industries

6,500+
employees

5,500+
partners

RESULTS

20%
reduction in capital
project costs

16%+
reduction in energy
usage

30%+
improvement in overall
equipment effectiveness

\$100M
saved from preventing
asset downtime

AVEVA

Industries are facing complex challenges in a changing market

ESG regulations

Improve sustainability, reduce carbon intensity and emissions

Supply chain and service disruptions

Capital projects and supply chain agility and resilience

Consumer desire for green alternatives

New materials, processes, and facilities for circular economy

Commodity price fluctuations

Operational efficiency, optimized planning and scheduling

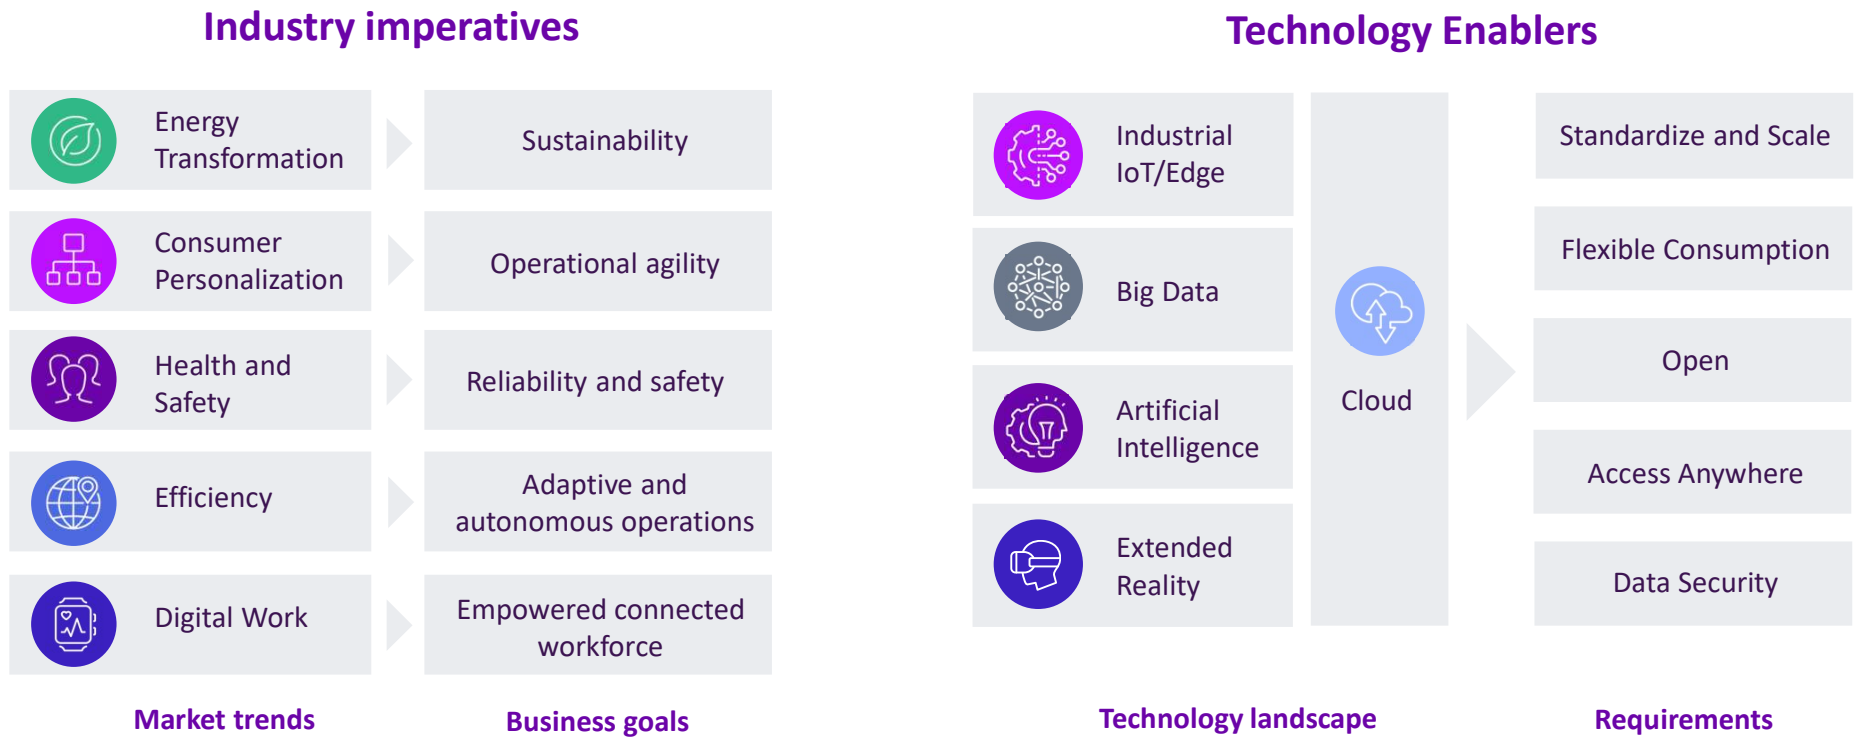

Labor shortages and remote work

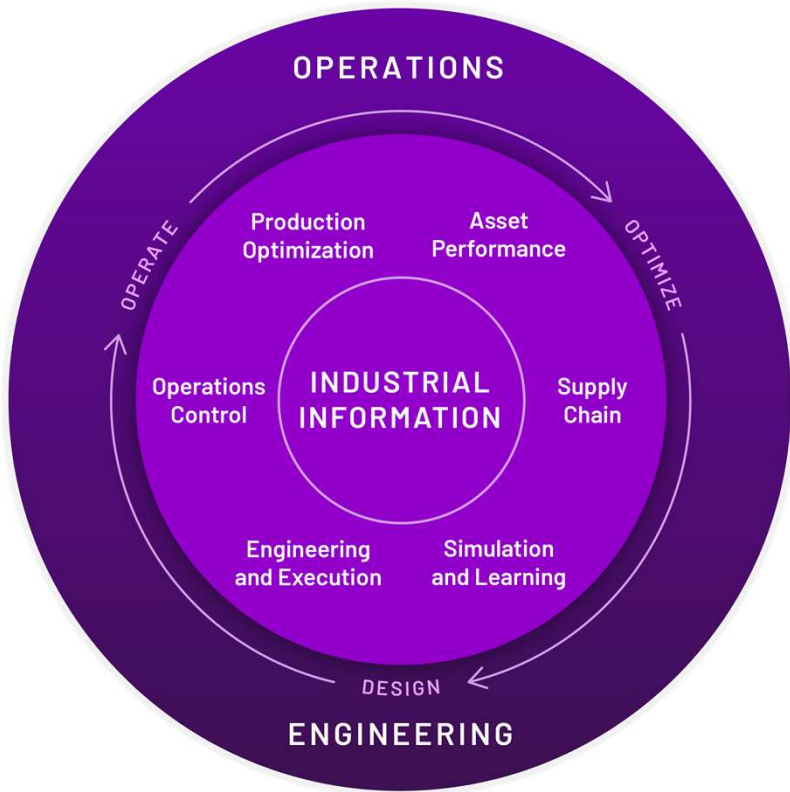

Connected and empowered workforce, autonomous operations

Manufacturing Performance & Operational Resilience

The new business and technology imperatives

Asset and Process lifecycle shaped by the market environment

Provide remote 'digital' teams rich information and **decision support** to **collaborate** and work efficiently

Run **agile, continuously optimized** supply chains to protect the bottom line

Operate critical assets **reliably and safely** with reduced manual supervision

Re-plan CapEx and drive highest levels of **engineering efficiency**

Connected Worker

Digital Twin

Artificial Intelligence

Cloud

Big Data

Industrial IoT/Edge

Enabling the **Connected Industrial Economy**

AVEVA

50%

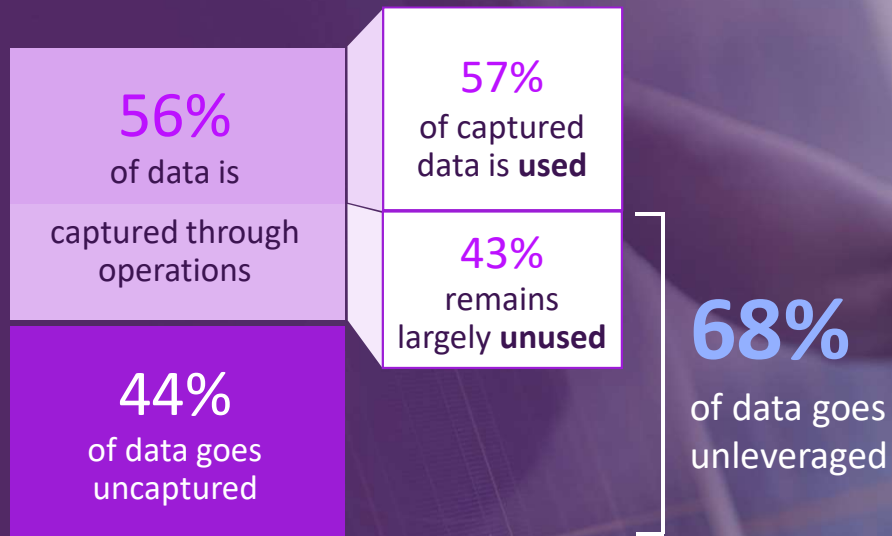

of all industrial data
was created in the last
2 years. In 2024 that
will still be true.

Statista, June 2021

AVEVA

According to Seagate,
only **32%** of the data available
to enterprises was put to work

Source: *The Seagate Rethink Data Survey, IDC, 2020*

Industrial companies struggle to share timely, accurate data across their global ecosystem

Imagine if all parties in a value chain were optimized in parallel: Data is the accelerator of the connected industrial economy

Organizations that share data externally with their partners generate **3x more measurable economic benefit** than those that do not.

Organizations adopting data hub strategies will achieve outcomes dependent on shared data with at least **60% lower cost.**

AVEVA

Data becomes the foundation of a connected community

Typical Architectures

AVEVA

Industrial Internet of Things (IIoT) / Industry 4.0

Evolution of Industrial Automation Systems

Limited functionality

local automation

Limited reach

fixed location automation, machine, plant

Low scalability

proprietary systems and protocols

Multiple functionalities

analytics, performance, diagnostics, networks, etc

Global reach

mobility, internet, low cost with economies of scale

High scalability

standard protocols, apps, ecosystems

Success is Local, and Cloud...and Edge!

It's not one flavour over the other – Industry 4.0 is about creating optimal combinations

Local computing

- Difficult maintenance
- Slow upgrade cycle
- Works disconnected
- Guaranteed cyber-security
- High speed, low latency
- Large install-base

Cloud computing

- Aggregate and combine
- Access anywhere, any time
- Frequent upgrades of functionality
- Requires connection
- Lower reliability for real time operations
- Limited control for communication optimization

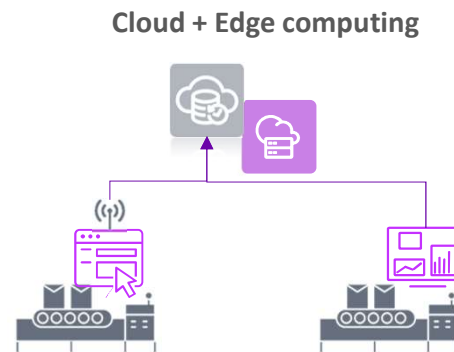

Cloud + Edge computing

- Combines best of local & cloud computing benefits
- Access anywhere, any time
- Works off-line with high-speed local processing
- Frequent upgrades of functionality
- Out-of-the box setup, rapid replacement strategies
- Requires occasional access to internet

Hybrid solutions

It's not one flavour over the other – Industry 4.0 is about creating optimal combinations

- Combines best of local & cloud computing benefits
- Access anywhere, any time
- Works off-line with high-speed local processing
- Frequent upgrades of functionality
- Out-of-the box setup, rapid replacement strategies
- Requires occasional access to internet

Industrial Internet of Things (IIoT) / Industry 4.0

Main components

Main Benefits

 Productivity

 Reliability

 Security

Portability

Mobility

Interoperability

Real-world examples

AVEVA

Digital Transformation example at ADNOC

Intelligent Operations Unified Operations Center (UOC) for Oil & Gas Operations

Early results of
\$80M Savings per run
From value chain optimization

Deployed at scale across
14 OPCOs

Improved Visibility
For faster decision making

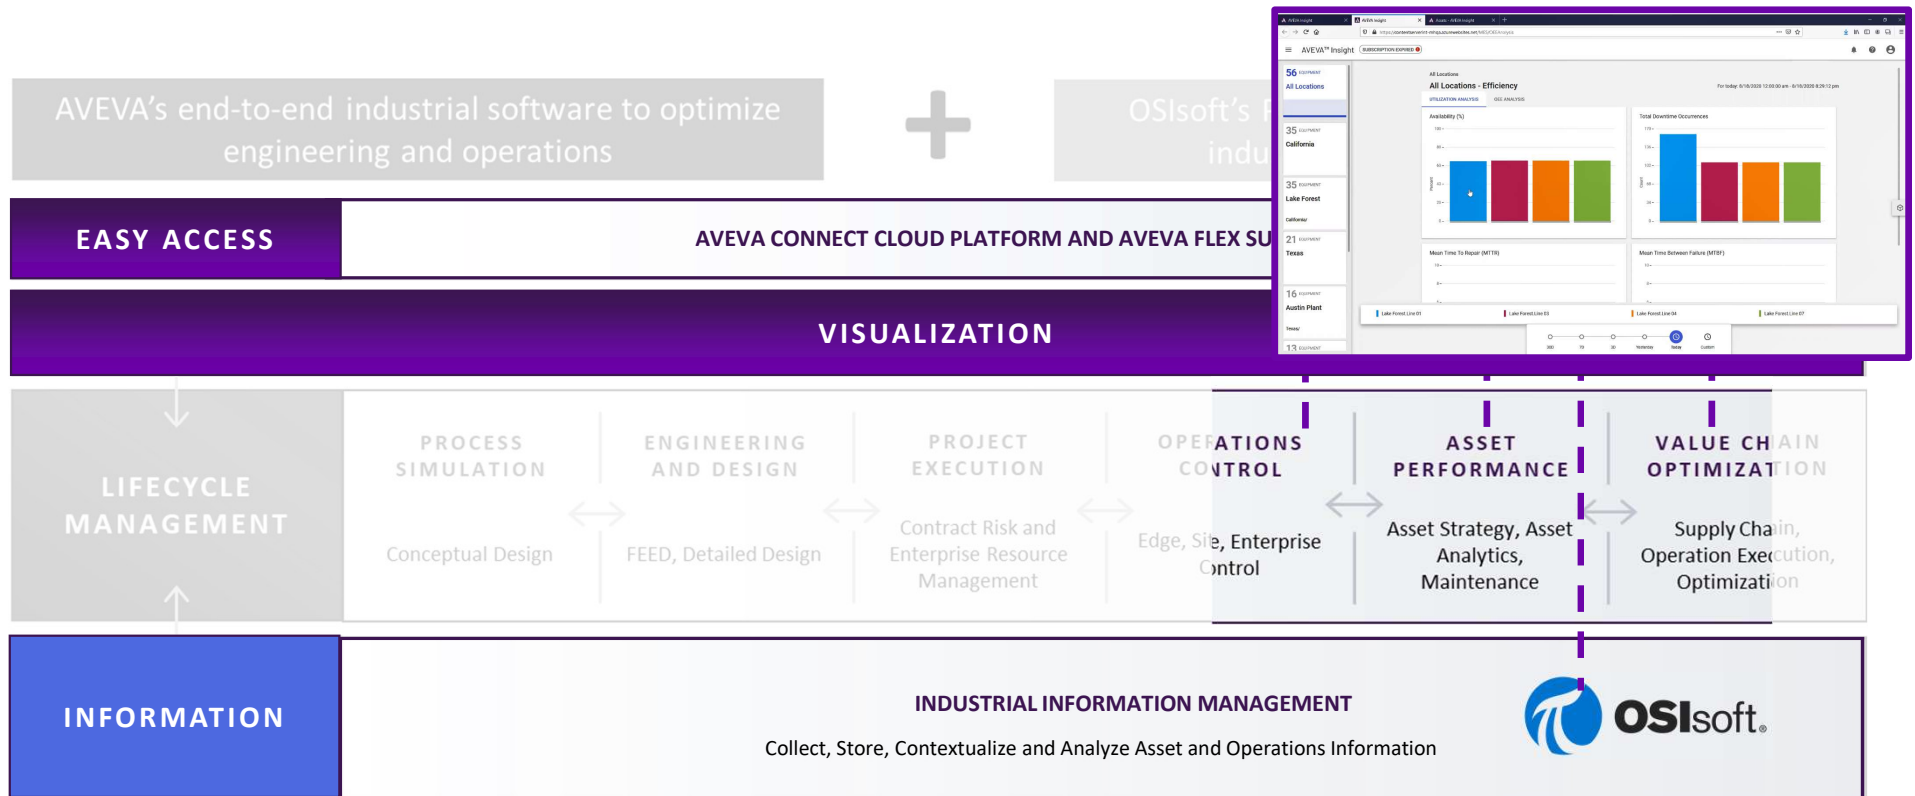

Abu Dhabi National Oil Company (ADNOC) implemented the Panorama Command Center within ADNOC to monitor, control and optimize the performance of the entire end-to-end value chain across their 14 operating companies (OPCOs).

Combining world-class software to drive Performance Intelligence

Cloud Hybrid Example: Integrated and Unified Aggregation, Visualization, Analytics

ABOUT AVEVA

AVEVA is a global leader in engineering and industrial software driving digital transformation across the entire asset and operational life cycle of capital-intensive industries.

The company's engineering, planning and operations, asset performance, and monitoring and control solutions deliver proven results to over 16,000 customers across the globe. Its customers are supported by the largest industrial software ecosystem, including 4,200 partners and 5,700 certified developers. AVEVA is headquartered in Cambridge, UK, with over 4,400 employees at 80 locations in over 40 countries.
